Family and Medical Leave Act of 1993 Section 825.112 Qualifying Reasons for Leave

A “*Serious Health Condition*” means an illness, injury, impairment, or physical or mental condition that involves one of the following: A serious health condition involving continuing treatment by a health care provider includes any one or more of the following:

1. Hospital Care

Inpatient care (i.e., an overnight stay) in a hospital, hospice, or residential medical care facility, including any period of incapacity or subsequent treatment in connection with or consequent to such inpatient care.

2. Incapacity and Treatment

A period of incapacity of **more than three consecutive, full calendar days**, and any subsequent treatment or period of incapacity relating to the same condition, that also involves:

- a. **Treatment¹ two or more times**, within 30 days of the first day of incapacity, unless extenuating circumstances exist, by a health care provider, by a nurse or physician’s assistant under direct supervision of a health care provider, or by a provider of health care services (e.g., physical therapist) under orders of, or on referral by, a health care provider; or
- b. **Treatment** by a health care provider on **at least one** occasion which results in a regimen of continuing **treatment²** under the supervision of a health care provider.

The requirement in (a) and (b) of this section for treatment by a health care provider means an in-person visit to a health care provider. The first (or only) in-person treatment visit must take place within seven days of the first day of incapacity.

Whether additional treatment visit or a regimen of continuing treatment is necessary within the 30-day period shall be determined by the health care provider.

The term “extenuating circumstances” in (a) of this section means circumstances beyond the employee’s control that prevent the follow-up visit from occurring as planned by the health care provider. Whether a given set of circumstances are extenuating depends on the facts. For example, extenuating circumstances exist if a health care provider determines that a second in-person visit is needed within the 30-day period, but the health care provider does not have any available appointments during that time period.

3. Pregnancy or Prenatal Care

Any period of incapacity due to **pregnancy**, or for **prenatal care**.

4. Chronic Conditions

Any period of incapacity or treatment for such incapacity due to a chronic serious health condition.

A chronic serious health condition is one which:

- a. Requires **periodic visits** (defined as at least twice a year) for treatment by a health care provider, or by a nurse or physician’s assistant under direct supervision of a health care provider;
- b. Continues over an **extended period of time** (including recurring episodes of a single underlying condition);
- c. May cause **episodic** rather than a continuing period of incapacity (e.g., asthma, diabetes, epilepsy, etc.).

5. Permanent/Long-Term Conditions Requiring Supervision

A period of incapacity which is **permanent** or **long-term** due to a condition for which treatment may not be effective. The employee or family member must be **under the continuing supervision of, but**

need not be receiving active treatment by, a health care provider. Examples include Alzheimer's, a severe stroke, or the terminal stages of a disease.

6. Multiple Treatments (Non-Chronic Conditions)

Any period of absence to receive **multiple treatments** (including any period of recovery there from) by a health care provider or by a provider of health care services under orders of, or on referral by, a health care provider, either for **restorative surgery** after an accident or other injuries, or for a condition that **would likely result in a period of incapacity of more than three consecutive, full calendar days in the absence of medical intervention or treatment**, such as cancer (chemotherapy, radiation, etc), severe arthritis (physical therapy), or kidney disease (dialysis).

Absences attributable to incapacity under (3) or (4) qualify for FMLA leave even though the employee or the covered family member does not receive treatment from a health care provider during the absence, and even if the absence does not last more than three consecutive, full calendar days. For example, an employee with asthma may be unable to report for work due to the onset of an asthma attack or because the employee's health care provider has advised the employee to stay home when the pollen count exceeds a certain level. An employee who is pregnant may be unable to report to work because of severe morning sickness.

¹Treatment includes examinations to determine if a serious health condition exists and evaluations of the condition. Treatment does not include routine physical examinations, eye examinations, or dental examinations.

²A regimen of continuing treatment includes, for example, a course of prescription medication (e.g., an antibiotic) or therapy requiring special equipment to resolve or alleviate the health condition. A regimen of treatment does not include the taking of over-the-counter medications such as aspirin, antihistamines, or salves; or bed-rest, drinking fluids, exercise, and other similar activities that can be initiated without a visit to a health care provider.
